Front-end engineer/UI with **2+ years of experience** building scalable SaaS platforms and high-performance web applications used by tens of thousands of users. Specialized in React, Next.js (SSR/SSG/ISR), TypeScript and Material UI and real-time systems. Proven track record of improving performance (40%+ faster loads), supporting 10,000+ concurrent users, and delivering reusable component architectures. Experienced in leading teams, optimizing UX, and collaborating across product, design, and backend teams.

Work Experience

Senior UI UX Designer and Developer **Zetech University** **June 2026 – August 2026(Contract-base)**
University Website Redesign — Development Kenya

- Redesigned the Zetech University website with a modern and user-focused UI/UX, improving the overall visual design, navigation, and user experience.
- Designed and developed responsive layouts to ensure a consistent and seamless experience across desktop, tablet, and mobile devices.
- Worked on the frontend development of the **Integration Hub** project, implementing responsive UI components and frontend interfaces based on design and project requirements.

UI | Frontend Developer **OZ Outsourcing** **Nov 2025 – Jan 2026(Contract-base)**
Transportation Tracking & Monitoring System Mohali, India

- Designed and developed a responsive user interface for the Transportation Tracking & Monitoring System using HTML, CSS, and JavaScript, ensuring smooth performance across desktop, tablet, and mobile devices.
- Implemented real-time tracking dashboard **UI** to display vehicle location, status, and route information in a clear and user-friendly layout.
- Integrated Dark Mode and Light Mode theme switching, improving user experience and accessibility with dynamic theme handling using JavaScript.

UIUX / Frontend Developer **Softuvo Solution** **Mar 2025 – Aug 2025**
Designer/Development team Mohali, India

- Designed and developed intuitive user interfaces for SaaS platforms, CRMs, and real-time applications serving 50,000+ monthly active users
- Translated Figma prototypes into responsive, pixel-perfect web applications with 98%+ design accuracy using React.js and modern CSS frameworks
- Built reusable UI systems with Material UI, Chakra UI, Tailwind, and Semantic UI, reducing development time by
- Led a team of 2 members and coordinated project development tasks.

Associate UI Developer **Softobiz** **Jan 2023 – Feb 2025**
Designer/Development team Mohali, India

- Improved application performance by **15–40%** through code splitting, lazy loading, memoization, and advanced caching strategies across React and Next.js apps
- Implemented **SSR, SSG, and ISR** in Next.js, achieving up to **40% faster initial page loads** and improved SEO rankings
- Designed and built a reusable **component library using Storybook**, reducing development time by 30% and ensuring UI consistency across 5+ enterprise applications
- Built and scaled SaaS platforms, CRMs, and real-time chat applications with WebSocket integrations using PubNub, handling 10,000+ concurrent users
- Collaborated with cross-functional teams using Git workflows, Azure DevOps, AWS S3, and Figma for seamless design-to-development handoffs

Technologies and Languages

- **Languages & Core:** JavaScript, TypeScript, HTML5, CSS3, SCSS, jQuery
- **Frontend & Frameworks:** React.js, Next.js (SSR, SSG, ISR), Redux Toolkit, React Query, Vue.js, Angular.js | Material UI, Chakra UI, Tailwind CSS, Bootstrap, Storybook.js
- **Tools & DevOps:** Git/GitHub, Azure DevOps, AWS S3, WordPress, Vercel
- **Design & AI:** Figma, GSAP, Framer Motion, Usability Testing, WCAG | Cursor AI, ChatGPT, Lovable, Bolt, Prompt Engineering
- **Others:** RESTful APIs

Selected Projects

EasyWebinar (Webinar Platform**) -** app.easywebinar.com

Tech Stack: React js, Next js, Storybook.js, PubNub, Websocket, Redux, Tailwind, Angular Material

- Handled end to end UIUX + Implemented Storybook.js for component documentation and testing, improving team collaboration and reducing onboarding time by 50%
- Collaborated with designers and backend developers to deliver pixel-perfect, highly responsive user interfaces.
- Optimized video streaming performance and conducted extensive user research to enhance UI/UX, resulting in 20% increase in user engagement
- Improved application performance, optimized API integration using Axios, and ensured cross-browser compatibility

EasyWebinar (marketing website**) -** easywebinar.com

Tech Stack: React.js, Next js, Redux, Tailwind UI, SCSS, WordPress, Figma

- Led full website development using **Next js** / variant of this via WordPress, optimizing for performance and SEO. Collaborated closely with **marketing** and **design teams** to create a responsive, conversion-focused UI. Managed ongoing SEO to enhance site visibility and drive traffic.

EasyDmarc (email-security app) - https://easydmarc.com/

Tech: Figma, WordPress,Html,Bootstrap.

- Developed responsive and interactive web pages using HTML5, CSS3, JavaScript, and Bootstrap, ensuring a smooth user experience across all devices.
- Customized and modified WordPress themes to support dynamic content management and maintain design consistency across the website.
- Implemented modern UI/UX design principles to create visually appealing layouts aligned with the platform's brand identity.
- Enhanced website interactivity using jQuery, including sliders, animations, and form validation to improve user engagement.
- Optimized website performance by compressing media files, reducing unnecessary scripts, and improving page load speed.
- Ensured cross-browser compatibility and mobile responsiveness using the Bootstrap grid system and responsive design techniques.

Education

- **BCA** — Rajiv Gandhi college, India (2017 – 2020)
- **MCA** — Himachal Pradesh University(2020-2023)
